

Compliance Evidence Audit Report

Generated 2026-06-13T12:33:41 · request sample-audit-report

Executive Summary

Across 9 requirements, 5 are COMPLIANT, 3 are PARTIAL, and 1 is a GAP, yielding an overall compliance score of 55.6% with 88.9% evidence coverage. Evidence collection is fully automated (100.0%), but overall freshness is low (29.9%), which is the primary driver of PARTIAL results in the audit logging controls. The strongest posture is in encryption controls (at rest, key rotation, and TLS), supported by recent, approved configuration/certificate evidence (CT-a1b2c3d4-0004-s3-enc, CT-a1b2c3d4-0005-s3-enc, CT-a1b2c3d4-0006-rds-enc, EVD00258, CT-a1b2c3d4-0001-kms-rotate, CT-a1b2c3d4-0008-elb-tls). The highest risk items are the administrative MFA requirement with no linked evidence (POL-AC-001-R1) and the logging requirements where available artifacts are stale relative to tight SLAs (EVD00054, EVD00004, EVD00020).

Overall compliance	Coverage	Evidence freshness	Auto-collected
56%	89%	30%	100%
5 compliant	3 partial	1 gap	508 evidence

Requirements

POL-AC-001-R1

Administrative access requires multi-factor authentication

GAP

Frameworks: NIST, CIS · Audit: Daily (SLA 1d) · Confidence: 10% · Next review: 2026-06-14

Status is GAP because there is no linked evidence demonstrating that administrative access requires multi-factor authentication. Proof is missing from the expected sources, specifically Azure AD Configuration and Login Logs, to show MFA enforcement for administrative accounts.

- No evidence collected for this requirement. Expected sources: Azure AD Configuration, Login Logs.

POL-AC-001-R2

Access must follow principle of least privilege

COMPLIANT

Frameworks: NIST, SOX · Audit: Quarterly (SLA 90d) · Confidence: 88% · Next review: 2026-05-23

Status is COMPLIANT based on approved access reporting that supports least-privilege access, with the primary supporting artifact within the quarterly SLA (EVD00153). Additional acceptable access reports further corroborate the control, though some older or low-confidence/rejected items exist and were not relied upon (EVD00380, EVD00478, EVD00001, EVD00011).

Evidence	Type	Collected	Age	Conf	Link	Flags
EVD00153	Access_Report	2025-12-26	76d	0.97	0.79	acceptable
EVD00380	Access_Report	2026-02-22	16d	0.78	0.79	acceptable
EVD00478	Access_Report	2025-10-31	63d	0.88	0.79	acceptable
EVD00001	Access_Report	2026-02-19	112d	0.57	0.79	stale, low_confidence
EVD00011	Access_Report	2026-02-19	50d	0.65	0.79	low_confidence, rejected
EVD00025	Access_Report	2026-04-19	28d	0.84	0.79	unreviewed
EVD00042	Access_Report	2026-04-17	168d	0.53	0.79	stale, low_confidence, rejected
EVD00043	Access_Report	2026-03-16	60d	0.93	0.79	needs_update

POL-AC-001-R3

Privileged accounts must have no personal use

COMPLIANT

Frameworks: NIST, CIS · Audit: Monthly (SLA 30d) · Confidence: 79% · Next review: 2026-04-30

Status is COMPLIANT supported by recent, approved configuration and screenshot evidence indicating privileged accounts are restricted from personal use (EVD00038, EVD00235, EVD00283, EVD00472). One older configuration snapshot is flagged as stale and needs update, but the current acceptable evidence is within the monthly SLA (EVD00030, EVD00038).

Evidence	Type	Collected	Age	Conf	Link	Flags
EVD00038	Configuration_Snapshots	2026-02-10	16d	0.93	0.66	acceptable
EVD00235	Screenshot	2026-02-20	11d	0.85	0.63	acceptable
EVD00283	Screenshot	2026-03-31	9d	0.97	0.63	acceptable
EVD00472	Screenshot	2025-12-26	5d	0.72	0.63	acceptable
EVD00030	Configuration_Snapshots	2026-03-25	113d	0.73	0.66	stale, needs_update
EVD00031	Configuration_Snapshots	2026-03-09	162d	0.80	0.66	stale, rejected
EVD00056	Configuration_Snapshots	2025-11-22	163d	0.68	0.66	stale, low_confidence, rejected
EVD00126	Configuration_Snapshots	2025-10-24	54d	0.89	0.66	stale, unreviewed

POL-AUD-001-R1 All access to sensitive data must be logged

PARTIAL

Frameworks: GDPR, NIST, SOX · Audit: Daily (SLA 1d) · Confidence: 23% · Next review: 2026-04-21

Status is PARTIAL because the available audit log evidence is stale relative to the daily (1d) SLA, so it does not demonstrate current logging of all access to sensitive data (EVD00054). Additional linked audit log artifacts are also stale and/or low confidence/rejected, limiting assurance of ongoing compliance (EVD00057, EVD00073, EVD00082, EVD00090).

Evidence	Type	Collected	Age	Conf	Link	Flags
EVD00054	Audit_Log	2026-03-08	149d	0.88	0.81	stale
EVD00057	Audit_Log	2026-02-28	83d	0.97	0.81	stale, needs_update
EVD00073	Audit_Log	2026-01-05	23d	0.55	0.81	stale, low_confidence
EVD00082	Audit_Log	2026-01-20	48d	0.91	0.81	stale, rejected
EVD00090	Audit_Log	2025-11-16	179d	0.67	0.81	stale, low_confidence
EVD00101	Audit_Log	2026-04-03	74d	0.58	0.81	stale, low_confidence
EVD00108	Audit_Log	2026-01-25	81d	0.57	0.81	stale, low_confidence, rejected
EVD00110	Audit_Log	2026-04-09	33d	0.59	0.81	stale, low_confidence, needs_update

- 85 evidence item(s) are stale (older than the 1d Daily SLA).
- 37 item(s) below the 0.70 confidence floor.
- 23 item(s) pending review.
- 16 item(s) flagged needs-update.

POL-AUD-001-R2 Logs must be retained for minimum 90 days

PARTIAL

Frameworks: PCI-DSS, NIST · Audit: Monthly (SLA 30d) · Confidence: 35% · Next review: 2026-05-17

Status is PARTIAL because the best available retention configuration snapshot is older than the monthly (30d) SLA and marked as needing update, so it does not provide timely proof of 90-day minimum log retention (EVD00004). Other linked snapshots are also stale and include rejected, low-confidence, or unreviewed items, which reduces confidence in the current retention posture (EVD00010, EVD00048, EVD00302, EVD00359).

Evidence	Type	Collected	Age	Conf	Link	Flags
EVD00004	Configuration_Snapshots	2026-01-25	40d	0.84	0.62	stale, needs_update
EVD00010	Configuration_Snapshots	2026-04-14	127d	0.74	0.62	stale, rejected
EVD00048	Configuration_Snapshots	2025-12-11	113d	0.52	0.62	stale, low_confidence, rejected
EVD00302	Configuration_Snapshots	2026-04-08	164d	0.99	0.62	stale, unreviewed
EVD00359	Configuration_Snapshots	2026-01-18	48d	0.69	0.62	stale, low_confidence, needs_update
EVD00479	Configuration_Snapshots	2026-03-28	148d	0.65	0.62	stale, low_confidence, rejected
EVD00145	Report	2025-12-08	133d	0.76	0.60	stale
EVD00215	Report	2026-04-01	117d	0.51	0.60	stale, low_confidence, rejected

- 26 evidence item(s) are stale (older than the 30d Monthly SLA).
- 17 item(s) below the 0.70 confidence floor.
- 7 item(s) pending review.
- 10 item(s) flagged needs-update.

POL-AUD-001-R3 Log access must be restricted and monitored

PARTIAL

Frameworks: ISO27001, NIST · Audit: Weekly (SLA 7d) · Confidence: 23% · Next review: 2026-03-01

Status is PARTIAL because the strongest evidence for restricting and monitoring log access is stale and unreviewed relative to the weekly (7d) SLA, so it cannot substantiate current enforcement (EVD00020). The remaining linked artifacts are also stale and/or low confidence/rejected/needs update, preventing full assurance that log access is presently restricted and monitored (EVD00062, EVD00208, EVD00316, EVD00364).

Evidence	Type	Collected	Age	Conf	Link	Flags
EVD00020	Audit_Log	2025-11-18	166d	0.80	0.77	stale, unreviewed
EVD00062	Audit_Log	2025-10-31	54d	0.79	0.77	stale
EVD00208	Audit_Log	2026-02-22	130d	0.60	0.77	stale, low_confidence, rejected
EVD00316	Audit_Log	2025-12-19	18d	0.54	0.77	stale, low_confidence, rejected
EVD00364	Audit_Log	2026-01-13	29d	0.73	0.77	stale, needs_update
EVD00456	Audit_Log	2025-11-10	164d	0.61	0.77	stale, low_confidence

- 6 evidence item(s) are stale (older than the 7d Weekly SLA).
- 3 item(s) below the 0.70 confidence floor.
- 1 item(s) pending review.
- 1 item(s) flagged needs-update.

POL-ENC-001-R1 All data at rest must be encrypted using AES-256 or stronger

COMPLIANT

Frameworks: PCI-DSS, GDPR, NIST · Audit: Monthly (SLA 30d) · Confidence: 84% · Next review: 2026-07-12

Status is COMPLIANT supported by recent, approved encryption certificates/configuration evidence showing data at rest encryption meeting the stated standard, within the monthly SLA (CT-a1b2c3d4-0004-s3-enc, CT-a1b2c3d4-0005-s3-enc, CT-a1b2c3d4-0006-rds-enc). Older encryption artifacts exist but are stale/rejected and were not required to establish current compliance (EVD00015, EVD00077).

Evidence	Type	Collected	Age	Conf	Link	Flags
CT-a1b2c3d4-0004-s3-enc	Encryption_Cert	2026-06-12	1d	0.90	0.77	acceptable
CT-a1b2c3d4-0005-s3-enc	Encryption_Cert	2026-06-10	3d	0.90	0.77	acceptable
CT-a1b2c3d4-0006-rds-enc	Encryption_Cert	2026-06-08	5d	0.90	0.77	acceptable
EVD00015	Encryption_Cert	2025-12-13	99d	0.79	0.77	stale, needs_update
EVD00077	Encryption_Cert	2026-03-11	173d	0.53	0.77	stale, low_confidence, rejected
EVD00114	Encryption_Cert	2025-11-15	21d	0.97	0.77	rejected
EVD00174	Encryption_Cert	2026-01-31	33d	0.57	0.77	stale, low_confidence
EVD00214	Encryption_Cert	2025-11-25	92d	0.82	0.77	stale, rejected

POL-ENC-001-R2 Encryption keys must be rotated at least annually

COMPLIANT

Frameworks: ISO27001, NIST · Audit: Quarterly (SLA 90d) · Confidence: 74% · Next review: 2026-07-01

Status is COMPLIANT based on recent, approved key management reporting and supporting procedure evidence demonstrating annual (or better) key rotation within the quarterly SLA (EVD00258, EVD00049, EVD00347). Additional acceptable evidence within the SLA further supports the control's ongoing operation (EVD00360, EVD00170).

Evidence	Type	Collected	Age	Conf	Link	Flags
EVD00258	Report	2025-11-06	5d	0.85	0.64	acceptable
EVD00360	Report	2025-10-23	84d	0.79	0.64	acceptable
EVD00049	Procedure_Evidence	2026-01-21	16d	1.00	0.62	acceptable

EVD00170	Procedure_Evidence	2026-03-07	82d	0.82	0.62	acceptable
EVD00347	Procedure_Evidence	2026-03-15	7d	0.99	0.62	acceptable
EVD00350	Procedure_Evidence	2026-01-06	59d	0.79	0.62	acceptable
EVD00363	Procedure_Evidence	2026-02-05	52d	0.86	0.62	acceptable
EVD00386	Procedure_Evidence	2025-12-31	16d	0.85	0.62	acceptable

POL-ENC-001-R3 Data in transit must use TLS 1.2 or higher

COMPLIANT

Frameworks: GDPR, NIST · Audit: Continuous (SLA 1d) · Confidence: 84% · Next review: 2026-06-13

Status is COMPLIANT supported by recent, approved certificate/configuration evidence indicating TLS 1.2 or higher for data in transit, meeting the continuous (1d) SLA (CT-a1b2c3d4-0001-kms-rotate, CT-a1b2c3d4-0008-elb-tls). Older artifacts are present but are stale/unreviewed/rejected and were not relied upon for current-state validation (EVD00002, EVD00009, EVD00012).

Evidence	Type	Collected	Age	Conf	Link	Flags
CT-a1b2c3d4-0001-kms-rotate	Encryption_Cert	2026-06-12	1d	0.90	0.79	acceptable
CT-a1b2c3d4-0008-elb-tls	Encryption_Cert	2026-06-12	1d	0.90	0.79	acceptable
EVD00002	Encryption_Cert	2025-11-02	153d	0.94	0.79	stale, needs_update
EVD00009	Encryption_Cert	2025-11-03	122d	0.70	0.79	stale, unreviewed
EVD00012	Encryption_Cert	2026-04-01	134d	0.54	0.79	stale, low_confidence, rejected
EVD00014	Encryption_Cert	2026-02-26	25d	0.73	0.79	stale, unreviewed
EVD00017	Encryption_Cert	2026-03-28	42d	0.54	0.79	stale, low_confidence, needs_update
EVD00039	Encryption_Cert	2026-03-11	40d	0.85	0.79	stale

Compliance statuses are derived deterministically from evidence attributes (freshness vs audit-frequency SLA, confidence, review status) and semantic linking — not from the dataset's provided anomaly labels, which were found inconsistent with the underlying evidence. Narratives are LLM-written from these computed facts. Review with a qualified auditor.
